ABSTRACT

This study attempts to determine the proportion of Arizona public high school students who complete requirements for a high school diploma within 4 years. For 1993, 157 Arizona public high schools and special programs with 12th grade students in 1992-93 submitted a graduation rate report. The mean 4-year graduation rate was 68%, and the median graduation rate (the midpoint of graduation rates when ordered by rank) was 73%. The rate for high schools ranged from a low of 12% to 100%. The national goal for 1992, 80% was met or exceeded by 45 of the high schools, and another 22 schools were within 5 percentage points of the goal. In 96 schools there was a gap between minority and white graduation rates. The mean graduation rates by ethnicity were: (1) White, 74%; (2) Black, 59%; (3) Hispanic, 56%; (4) American Indian, 61%; and (5) Asian, 78%. In all five ethnic groups, graduation rates were higher for females. The graduation rate for the Class of 1993 continued an upward trend in Arizona graduation rates, with the greatest improvement among American Indians. When fifth-year graduates were considered, the graduation rate for the class of 1993 rose to 71%. Eleven tables and six charts present graduation data. Five appendixes contain rankings of schools, districts, and counties by graduation rate in an additional 198 tables and 1 figure, as well as the reporting form and instructions. (SLD)

I. INTRODUCTION

This study attempts to determine the proportion of Arizona public high school students who complete requirements for a high school diploma within four years. Graduation rates are frequently used as a means of measuring a school's success in retaining and graduating students. Both the U.S. Department of Education and the Arizona Department of Education (ADE) are committed to improving high school graduation rates ¹.

The nature of a longitudinal study requires diligence in tracking students over a period of time. Some districts, during the initial years of this study, have had difficulty retrieving historic information in the format required. The ADE also recognizes that, because school staff are frequently unable to locate students who were unaccounted for in prior years, the graduation rates are likely to be understated and four-year dropout rates are likely to be overstated.

This year, 157 Arizona public high schools and special programs with twelfth grade students in 1992-93 submitted a graduation rate report for the Class of 1993. This report summarizes the schools' graduation rate reports.

¹ The second of six National Education Goals reads "By the year 2000, the high school graduation rate will increase to at least 90 percent. Objectives: The nation must dramatically reduce its dropout rate and 75% of those students who do drop out will successfully complete a high school degree or its equivalent. The gap in high school graduation rates between American students from minority backgrounds and their non-minority counterparts will be eliminated." Two interim goals were set: an 80% graduation rate by 1992 and an 85% graduation rate by 1996. The State Board of Education adopted this goal along with others presented in the final report of the Joint Legislative Committee on Goals for Arizona's Educational Excellence, on January 25, 1988.

II. EXECUTIVE SUMMARY

The purpose of this study was to determine for every public high school in Arizona the proportion of students who completed graduation requirements within four years. Graduation rates were calculated by high school, district, county, and state to measure the success of student retention programs.

Membership in the Class of 1993 was defined as

- o students who were first time ninth-graders during the school year 1989-90, plus**
- o students who transferred into that class at any time during the four years, minus**
- o students who died or transferred to another school during the four years.**

A graduate was defined as a student who

- o completed graduation requirements for a high school diploma; or**
- o received a Certificate of Completion, Certificate of Attendance, or other non-traditional diploma recognized as meeting graduation requirements.**

All 157 high schools and special programs with twelfth grade students submitted graduation rate reports. The mean (average) four-year graduation rate was 68%. The median graduation rate (the midpoint of the schools' graduation rates when ordered by rank) was 73%. The graduation rates for high schools ranged from 12% at Howenstine School to 100% at Joseph City High School and San Simon High School.

The national goal for 1992 -- an 80% graduation rate -- was met or exceeded by 45 of the high schools in this year's study. Another 22 high schools were within five percentage points of the goal. One objective of the goal was to eliminate the gap in graduation rates between minority students and their non-minority (White) counterparts. Fewer than one-third of the schools have achieved that objective. Forty-one schools had minority rates that were equal to or greater than the White graduation rates and 14 more were within five percentage points, but 96 schools still have a gap between the White and minority graduation rates.

The mean graduation rates by ethnicity were White - 74%, Black - 59%, Hispanic - 56%, American Indian - 61%, and Asian - 78%. In all five ethnic groups, mean graduation rates were higher for females than for males by six to nine percentage points. The average male graduation rate was 65%, compared to a female graduation rate of 71%. Graduation rates were lowest for Pima County (57%) and highest for Greenlee County (87%).

Seven percent of the Class of 1993 were still enrolled and could graduate in their fifth year. Males, particularly minority males, were more likely than female students to be enrolled for a fifth year of high school. Twenty-five percent of the Class of 1993 had dropped out or their

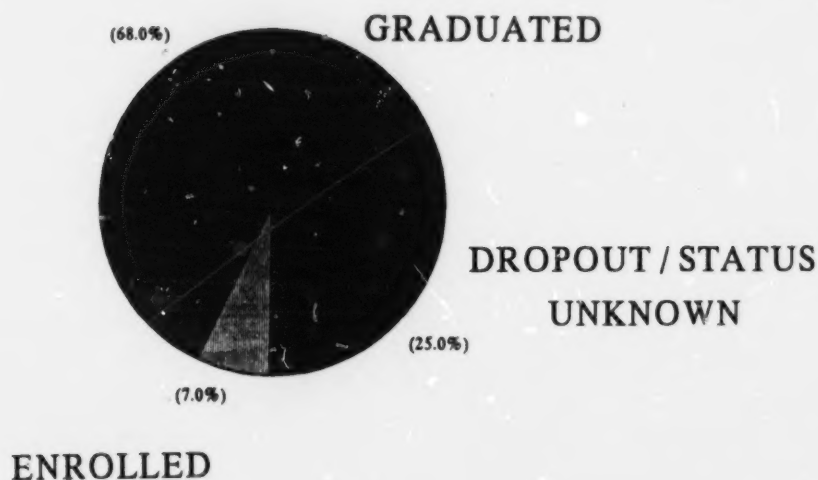

status was unknown at the end of the study. (The reader should note that this is a **four-year** dropout rate, which should not be compared to the **annual** dropout rates reported in a separate study.) More than 800 of these dropouts earned a General Educational Development (GED) certificate; if they were considered to be graduates, the on-time completion rate would be 70%.

The graduation rate for the Class of 1993 continued an upward trend in graduation rates. Comparing the Class of 1993 to the Class of 1992, the mean graduation rates improved for all ethnic groups except Hispanic students. American Indian graduation rates improved the most, improving from 56% in 1992 to 61% in 1993. Male rates improved by one percentage point; female rates were unchanged. Graduation rates improved for 82 of the 134 schools in last year's study. Four schools' rates remained the same and 48 schools had lower graduation rates this year.

At the time of last year's report, approximately seven percent of the Class of 1992 was still enrolled. Fifth-year graduates from that class raised the graduation rate from 67% to 71%. American Indian, Hispanic, and Asian students showed the greatest gains in graduation rates after their fifth year, with an additional five to six percent graduating. An additional three percent of White and Black students graduated after their fifth year.

The chart below shows the proportions of the Class of 1993 which graduated on time, were still enrolled, and whose status was unknown.

Chart 1
Status of the Class of 1993

III. DEFINITIONS, METHODOLOGY, AND LIMITATIONS

Definitions

Membership in the Class of 1993 was defined as

- o students who were first-time ninth-graders during the school year 1989-90, plus
- o students who transferred into that class at any time during the four years, minus
- o students who died or transferred to another school during the four years.

A student was considered to have transferred to another school if there was verifiable evidence in the student record of enrollment in another educational program leading to a high school diploma, whether public or private, in or out of the state. Verifiable evidence included a transcript request from the other school or notification by a responsible adult that the student had enrolled in another school. If the student left school and enrolled in a school or educational program which did not offer courses leading to a high school diploma (e.g., barber/beauty school, other vocational training, or GED preparatory classes), the student was numbered among the dropouts and students whose status was unknown.

A graduate was defined as a student who

- o completed graduation requirements for a high school diploma; or
- o received a Certificate of Completion, Certificate of Attendance, or other non-traditional diploma recognized as meeting graduation requirements.

A student who left school and earned a G.E.D. certificate was not considered a graduate.

After identifying the members of the Class of 1993, the school attributed one of three outcomes to each student: graduated, still enrolled, or dropped out/status unknown. The graduation rate for each school was calculated as the number of graduates divided by the number of students in the Class of 1993, expressed as a percentage. The proportion of students who were still enrolled was calculated as the number of students in the Class of 1993 who had not graduated and were still enrolled in school, divided by the number of students in the Class of 1993, expressed as a percentage. The dropout rate was calculated as the number of dropouts/status unknown divided by the number of students in the Class of 1993, expressed as a percentage. The reader should note that this is a four-year dropout rate which should not be confused with the school's annual dropout rate, presented in a separate report. Generally, a school's four-year dropout rate is less than four times the annual dropout rate because some dropouts return to school in a later year.

Methodology

ADE distributed forms and instructions for the graduation rate report at training sessions and by mail throughout 1993. The form and instructions are presented as Appendix E. Reports were submitted by all high schools which had twelfth grade students in 1992-93². The report data were entered into a database and the accuracy of the input was verified. Certain edit checks were randomly performed to test data reliability. When there were major discrepancies, the contact person at the school or district was notified by the ADE and verification or corrections were solicited. The random data checks are listed below.

- o Line A of the graduation rate report was compared to the school's Original Enrollment on its ninth grade Year End Enrollment report for 1989-90. Line A was expected to be equal to or slightly less than the Original Enrollment on the Year End Enrollment report, because students who were repeating ninth grade in 1989-90 were not to be included in the Class of 1993 study.
- o Line F of the graduation rate report was compared to the school's graduates from the twelfth grade on its Year End Enrollment report for 1992-93. They were expected to be roughly equivalent.
- o The number of graduates was compared to the number of completers reported on the USDE Completer Survey. The number of completers was expected to be higher than the number of graduates from the Class of 1993, because completers included late graduates from previous classes, e.g., Class of 1992, Class of 1991, etc.
- o The number of dropouts/unknown was compared to the total number of dropouts reported on Year End Enrollment reports for Grade 9 (1989-90), Grade 10 (1990-91), Grade 11 (1991-92), and Grade 12 (1992-93). Dropouts were expected to be roughly equivalent to the total reported over four years. The number of dropouts on the graduation rate report could be higher because summer dropouts were not reported on Year End Enrollment reports in school years before 1992-93, and because the dropout codes on Year End Enrollment reports before 1992-93 did not include as many situations as this study did. Conversely, the number of dropouts could be lower on the graduation rate report because some students dropped out more than once and could have been counted on more than one Year End Enrollment report.

The ADE notified the school when its report was found to be inconsistent with prior Year End

² Centennial High School (Peoria Unified District) and Mountain Pointe High School (Tempe Union High School District) will have their first graduating classes in 1994. The Arizona Department of Youth Treatment and Rehabilitation is working toward becoming accredited and does not yet graduate students. There are no separate reports for East Valley Institute of Technology and certain other specialized programs conducted by some districts for vocational training or special education, because students were included in their home schools' graduation rate reports.

Enrollment reports, requesting verification or correction. All but six schools ³ corrected their reports; those six questionable reports were included in the analysis, but were noted in this report as being inconsistent with other reports filed by the school.

Limitations

This longitudinal study requires the use of four years of student records. Some schools have discovered that certain critical data elements have been missing from their earlier records. In particular, some student recordkeeping systems have failed to account for students' activity (transfers out) over the summer. This has been a problem since the collection of graduation rate data began in 1990, but since the schools have made improvements in their recordkeeping, it is expected that they will be able to provide reliable reports next year, in the fourth year of the data collection program. The accuracy of the reports varies, depending on the quality of the school's recordkeeping system and the staff's ability to provide the data requested. The analysis of the graduation rate data was affected by other factors, as well:

- o Students who were taught at home (not enrolled in a public school) and students in private or Bureau of Indian Affairs schools, were not included in this study. Graduation requirements have not been specified for home-taught students, no diplomas are issued, and, to date, there is no way to determine the proportion of home-taught students who receive a GED certificate within four years.
- o The populations or subpopulations (e.g., Asian female) at some schools were very small, preventing a meaningful comparison of graduation rates expressed as percentages.
- o Some schools have not been operational for the full four years of the study ⁴. Their reports begin with the sophomore class of 1990-91, the junior class of 1991-92, or the senior class of 1992-93, depending on the year the high school opened. Their one-year, two-year, or three-year graduation rates are not comparable to other schools' four-year graduation rates.
- o Last year, five districts ⁵ were not included in the Graduation Rate Study because of incomplete or unreliable data; it was not possible to calculate a five-year graduation rate for the schools and programs in those districts.

³ Blue Ridge, Duncan, Fredonia, Gila Bend, Mohave, and Nogales high schools

⁴ East Valley High School opened in 1990-91; San Carlos High School and Chino Valley High School opened in 1991-92, Westview High School and River Valley High School opened in 1992-93.

⁵ Cave Creek Unified (Cactus Shadows High School), Chinle Unified (Chinle High School), Gila Bend Unified (Gila Bend High School), Tucson Unified (all schools and programs), and Window Rock Unified (Window Rock High School)

IV. ANALYSIS

Profile

The reports represented 44,414 members students in 152 schools and five special programs in 100 school districts. The table below shows the ethnic and gender composition of the Class of 1993.

Table 1
Ethnic and Gender Composition of the Class of 1993

	<u>Male</u>	<u>Female</u>	<u>Total</u>
White	31%	30%	61%
Black	2%	2%	4%
Hispanic	13%	13%	26%
American Indian	4%	3%	7%
Asian	1%	1%	2%
Total	51%	49%	100%

Graduation Rates

The mean graduation rate ⁶ was 68%. The median graduation rate ⁷ was 73%. The high schools' graduation rates ranged from 12% at Howenstine School to 100% at Joseph City High School and San Simon High School. The special programs, all of which were operated by Tucson Unified District, had graduation rates ranging from 0% in Project R.I.S.E., Teenage Parent Program, Homebound, and Project P.A.S.S. to 17% in Project M.O.R.E. Some of the variance in rates may be attributed to the proportions of ethnic groups and other characteristics of the schools' populations, but much of the variance should be attributed to differences in recordkeeping practices and dropout prevention efforts.

The national goal -- an 80% graduation rate -- was met or exceeded by 45 (29%) of the high

⁶ The mean rate, also known as the average, is the number of graduates divided by the number of students in the Class of 1993, expressed as a percentage.

⁷ The median is the midpoint of schools' rates in rank order. That is, half of the schools reported higher graduation rates and half reported lower rates.

schools in this year's study. Another 22 schools (14%) were within five percentage points of the goal. Twenty-nine schools, shown in the following table, have met or exceeded the 80% graduation rate goal for two consecutive years.

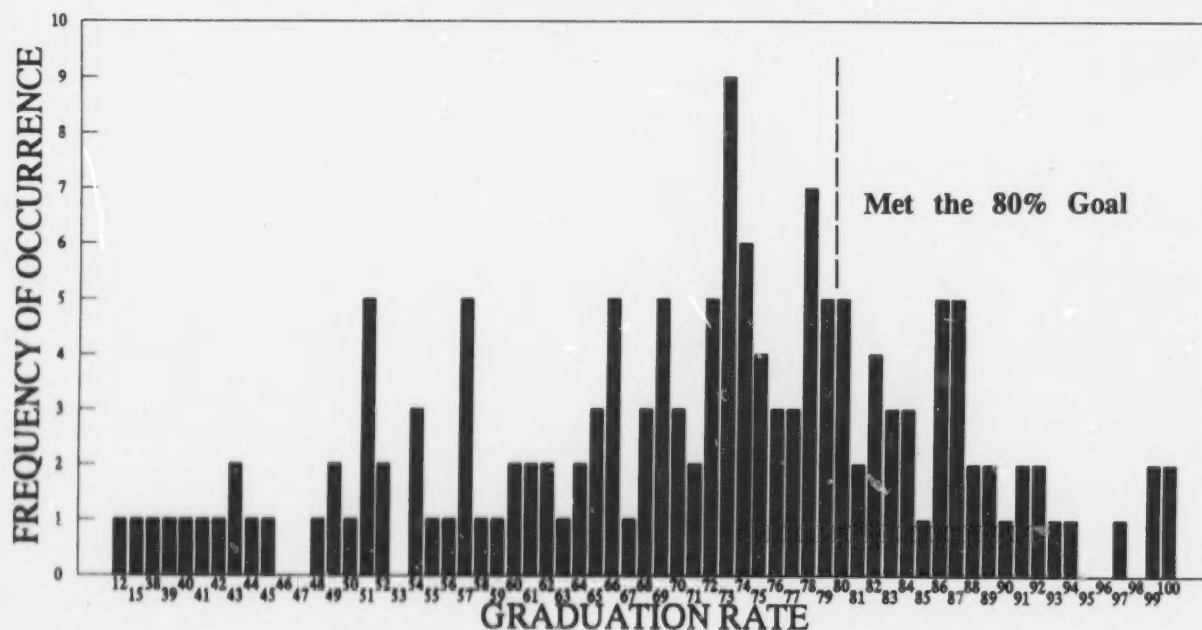

Table 2
High Schools Which Achieved 80% Graduation Rate
Class of 1992 and Class of 1993

Apache Junction High School	Marana High School
Blue Ridge High School *	Mesa High School
Cactus High School	Mt. View High School (Marana)
Chaparral High School	Mt. View High School (Mesa)
Corona del Sol High School	Patagonia High School
Dobson High School	Prescott High School
Duncan High School *	Saguaro High School
Flagstaff High School	San Simon High School
Fredonia High School *	Sinagua High School
Ft. Thomas High School	Snowflake High School
Grand Canyon High School	St. David High School
Horizon High School	Thatcher High School
Independence High School	Westwood High School
Ironwood High School	Valley Union High School
Joseph City High School	

* Data for Class of 1993 are unreliable (inconsistent with Year End Enrollment Reports filed by the school for 1989-90 through 1992-93). Gila Bend High School reported graduation rates above 80% for Class of 1993 and Class of 1992, but both years' reports were inconsistent with Year End Enrollment reports filed by the school.

The distribution of the schools' total graduation rates is shown in the following chart.

Chart 2
Distribution of Graduation Rates

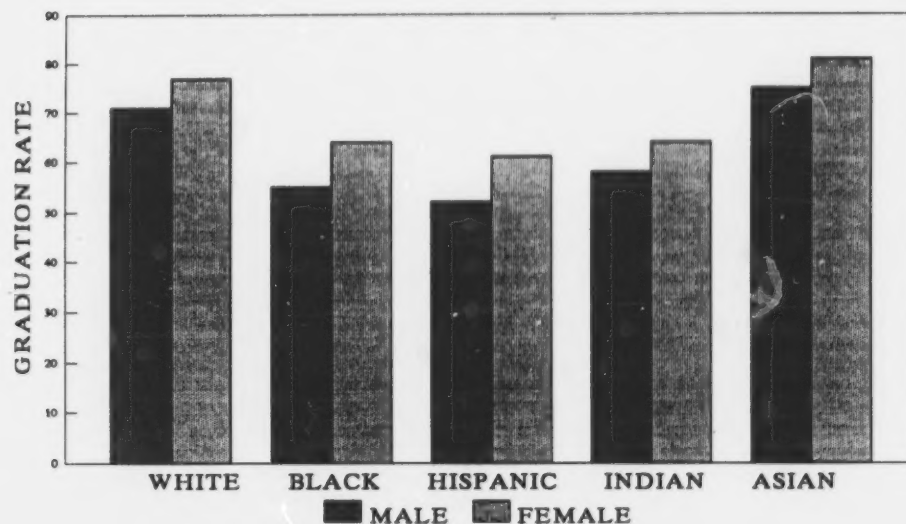

Graduation Rates by Ethnicity and Gender

Mean graduation rates were highest for Asian students (78%), followed by White students (74%), American Indian students (61%), Black students (59%), and Hispanic students (56%). In all five ethnic groups, mean graduation rates were higher for females than for males by six to nine percentage points. The following table and chart show the mean graduation rates by ethnicity and gender.

Table 3
Mean and Median Graduation Rates by Ethnicity and Gender

<u>Ethnicity</u>	<u>Mean Male</u>	<u>Mean Female</u>	<u>Mean</u>	<u>Median</u>
White	71%	77%	74%	76%
Black	55%	64%	59%	67%
Hispanic	52%	61%	56%	63%
American Indian	58%	64%	61%	59%
Asian	75%	81%	78%	86%
Total	65%	71%	68%	73%

Chart 3
Mean Graduation Rates by Ethnicity and Gender

One objective of the national goal was to eliminate the gap in the graduation rates between the ethnic minority groups and their non-minority (White) counterparts⁸. When each school's collective minority graduation rate was compared to its White rate, 41 schools (27%) had minority rates that equaled or exceeded the White graduation rate. The 13 high schools which

⁸ Four schools (Baboquivari, Estrella Mountain, Red Mesa, and San Carlos) had no White students and two schools (Colorado City and Young) had no minority students for a comparison.

met the 80% graduation rate goal and had minority rates equal to or exceeding the White rates are listed in the table below.

Table 4
High Schools Which Achieved 80% Graduation Rate and
Minority Rates Equal to or Exceeding White Rates

Bagdad High School	Joseph City High School
Blue Ridge High School	Patagonia High School
Cactus Shadows High School	Saguaro High School
Grand Canyon High School	San Simon High School
Hayden High School	University High School
Horizon High School	Valley Union High School
Ironwood High School	

Fourteen schools' (9%) minority graduation rates were within five percent of the White graduation rate, but 96 of the schools (64%) have not yet equalized their minority and non-minority graduation rates. Thirteen high schools had minority graduation rates which were more than 25 percentage points below the graduation rate for White students, as shown in the following table ⁹.

Table 5
High Schools with Disparity Between
White and Minority Graduation Rates

<u>High School</u>	<u>White</u> <u>Pop'n.</u>	<u>White</u> <u>Rate</u>	<u>Minority</u> <u>Pop'n.</u>	<u>Minority</u> <u>Rate</u>	<u>Rate</u> <u>Diff.</u>
Camp Verde	122	73%	21	48%	25%
Fredonia	22	100%	8	75%	25%
Westview	171	76%	146	51%	25%
Arcadia	231	81%	40	55%	26%
Willcox	86	80%	45	53%	27%

Central	260	62%	447	32%	30%
Sinagua	166	91%	62	61%	30%
Tuba City	3	100%	208	67%	33%
Pima	41	71%	6	33%	38%

⁹ Percentage comparisons may be invalid for schools with small numbers of White or minority students.

Graduation Rates by County

Mean graduation rates by county ranged from 57% (Pima County) to 87% (Greenlee County). The following table shows by county the number of high schools reporting, the number of students in the population base, and the mean graduation rate.

Table 6
Graduation Rates by County

<u>County</u>	<u>Schools</u>	<u>Students</u>	<u>Grad. Rate</u>
Apache	7	939	77%
Cochise	10	1,620	67%
Coconino	8	1,449	75%
Gila	6	601	67%
Graham	4	400	80%
Greenlee	3	152	87%
La Paz	2	241	60%
Maricopa	52	23,175	71%
Mohave	5	1,066	66%

Pinal	9	1,534	64%
Santa Cruz	2	516	73%
Yavapai	9	1,166	72%
Yuma	4	1,777	64%

Appendix C shows the graduation rate data summarized by counties.

Graduation Rates by Class Size

There was no relationship between mean graduation rates and class size. Two small high schools, Joseph City High School and San Simon High School, had 100% graduation rates, but several high schools with a class size of over 700 -- Mountain View High School (Mesa), Corona del Sol High School (Tempe), Dobson High School (Mesa), Gilbert High School and Mesa High School -- were also ranked among the top 20% of schools in the study. The following table shows the graduation rates according to class size.

Table 7
Graduation Rates by Class Size

<u>Class Size</u>	<u>Schools</u>	<u>Students</u>	<u>Grad. Rate</u>
Under 100	44	1,996	70%
100 - 199	32	4,612	71%
200 - 299	16	3,993	73%
300 - 399	14	4,881	67%
400 - 499	17	7,712	67%
500 - 599	19	10,483	67%
600 - 699	6	3,887	55%
700 - 799	7	5,209	74%
800 or more	2	1,640	69%

Students Who Are Still Enrolled

By definition, the Graduation Rate Study reports the percentage of students in the class who finished **on time**, that is, within four years of beginning high school. At first glance, many readers assume the rest of the class dropped out, an assumption which does not consider that many students simply require more time to finish graduation requirements.

This year 3,106 students, approximately seven percent of the Class of 1993, had not graduated but were still enrolled and could graduate in their fifth year of high school. Males, especially minority males, were more likely than female students to be enrolled for a fifth year. The following table shows the proportion of each ethnic and gender group of the Class of 1993 which was still enrolled.

Table 8
Proportion of Class of 1993 Still Enrolled
by Ethnicity and Gender

<u>Ethnicity</u>	<u>Male</u>	<u>Female</u>	<u>Total</u>
White	7%	4%	5%
Black	11%	6%	8%
Hispanic	12%	8%	10%
American Indian	11%	7%	9%
Asian	9%	6%	7%
Total	9%	5%	7%

The schools reporting the highest proportion of students who were still enrolled were Howenstine School (81%), Tucson Unified's Senior High Accommodation School (37%), and Polaris High School (25%), all schools with special populations. Baboquivari High School, with 23% of its class still enrolled for a fifth year, led the list for schools with normal student populations. The median rate of students still enrolled was five percent.

Members of the Class Whose Status was Unknown

Members of the Class of 1993 who had not graduated and were not still enrolled were classified as dropout/status unknown. In this study, 25% of the Class of 1993 had dropped out or their status was unknown at the time of the report. The reader should note that this is a four-year cumulative dropout rate, which should not be confused with the annual dropout rates reported from data collected in a separate study.

It is believed that many students in this category were unaccounted for (rather than traditional dropouts) because schools lacked the data required for a longitudinal study. Many schools, in order to comply with requirements of this study and the dropout study, have improved their student recordkeeping systems. The improvements in data collection and reporting are expected to have a positive effect on reported graduation rates over the next few years. In time, the status unknown portion of the four year dropout rate will be reduced to a minimum, providing a more accurate representation of the true graduation rate.

Dropouts Who Received a GED Certificate

In September, the ADE mailed each school a list of young adults who had received a GED ¹⁰ certificate in the prior twelve months and reported that school as their last school of attendance. The schools used the list and other sources to report a total of 818 students in the Class of 1993 who had dropped out but later received a GED certificate. This represented approximately almost two percent of the class. The proportion is probably higher than two percent because students could have received a GED certificate in another state, or in Arizona under another name, or they may have failed to report correctly their school of last attendance. When GED recipients were added to the number of graduates, the completion rate for the Class of 1993 was 70%. The ethnic and gender categories of GED recipients are shown in the following table.

¹⁰ General Educational Development

Table 9
GED Recipients by Ethnicity and Gender

<u>Ethnicity/Gender</u>	<u>Number</u>	<u>% of Class</u>
White	579	2.1%
Black	34	1.9%
Hispanic	173	1.5%
American Indian	27	0.9%
Asian	5	0.6%
Male	461	2.0%
Female	357	1.6%
Total	818	1.8%

Comparison of Graduation Rates to Earlier Classes

The graduation rate for the Class of 1993 continued an upward trend in graduation rates. Comparing the Class of 1993 to the Class of 1992, the mean graduation rates improved for all ethnic groups except Hispanic students, whose graduation rate declined by less than one percentage point. American Indian graduation rates improved the most, from 56% in 1992 to 61% in 1993. Male rates improved by one percentage point; female rates were unchanged.

The graduation rates of 82 schools improved since last year's study, four schools' rates remained the same, and 48 schools had lower graduation rates this year. Appendix A ranks the schools and programs by their Class of 1993 graduation rate and also shows the prior two years' rates for comparison. A substantial change in the rates from one year to the next probably indicates variances in data collection and reporting, rather than an actual change in the proportion of students who graduated. Also, in schools with small populations, slight changes in the number of graduates produced large changes in the graduation rates from one year to the next.

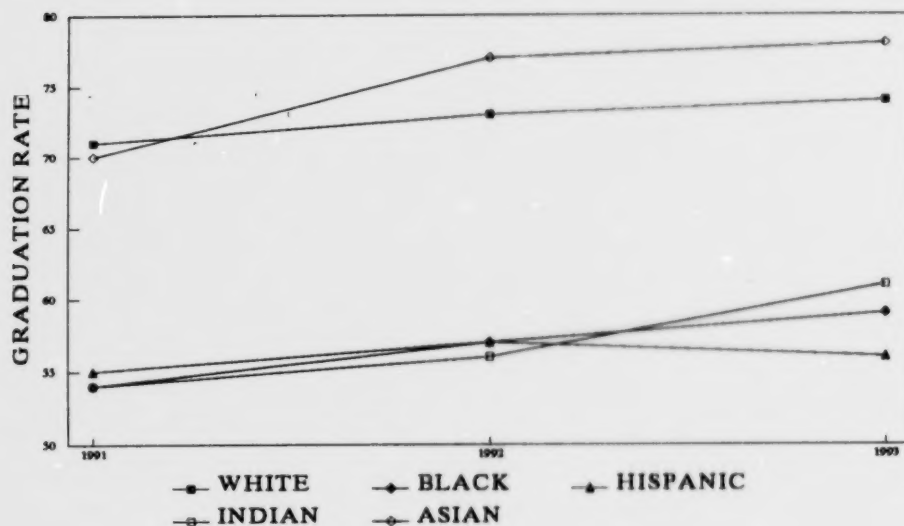

A comparison of the districts' rates showed that 56 districts (59%) improved since last year, three (three percent) remained the same, and 36 (38%) showed a decline. Appendix B shows three consecutive years of the districts' graduation rates.

The following table and chart show the three-year comparison of graduation rates for each ethnic and gender group.

Table 10
Mean Graduation Rates
1991 to 1993

<u>Ethnic/Gender</u>	<u>Class of 1991</u>	<u>Class of 1992</u>	<u>Class of 1993</u>

1991 to 1993

Five Year Graduation Rates of the Class of 1992

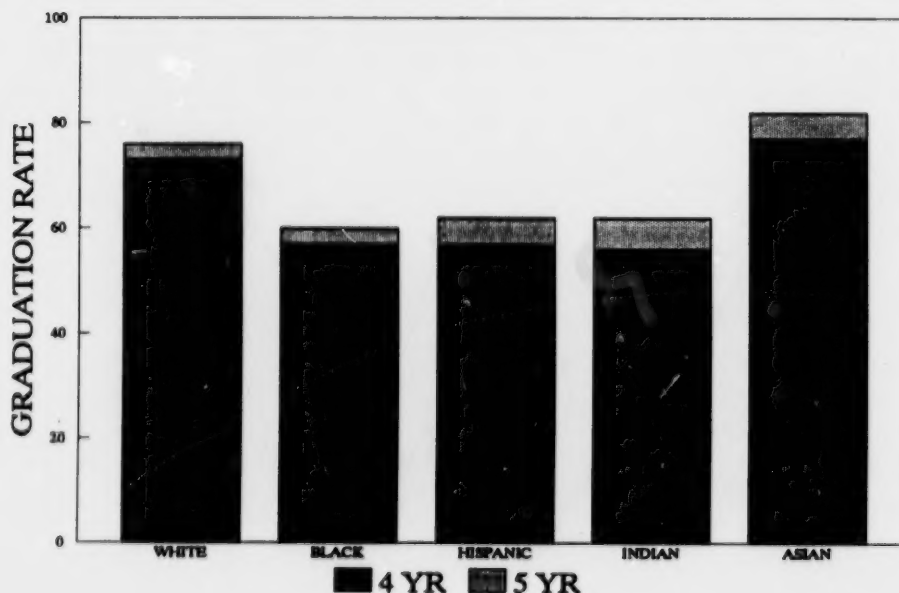

At the time of last year's report, approximately seven percent of the Class of 1992 were still enrolled for a fifth year of high school. This year, 1,458 late graduates from that class were reported, raising the graduation rate from 67% to 71%. American Indian, Hispanic, and Asian

students showed the greatest gain in graduation rates, with an additional five to six percent of the class graduating after their fifth year. An additional three percent of the White and Black students graduated after their fifth year. The mean five-year graduation rates by ethnic group are shown in the following table and chart.

Table 11
Four-Year and Five-Year Mean Graduation Rates
by Ethnicity and Gender
Class of 1992

	<u>4 Yr.</u>	<u>5 Yr.</u>
White	73%	76%
Black	57%	60%

Female	71%	74%
Total	67%	71%

Chart 5
Four-Year and Five-Year Graduation Rates
Class of 1992

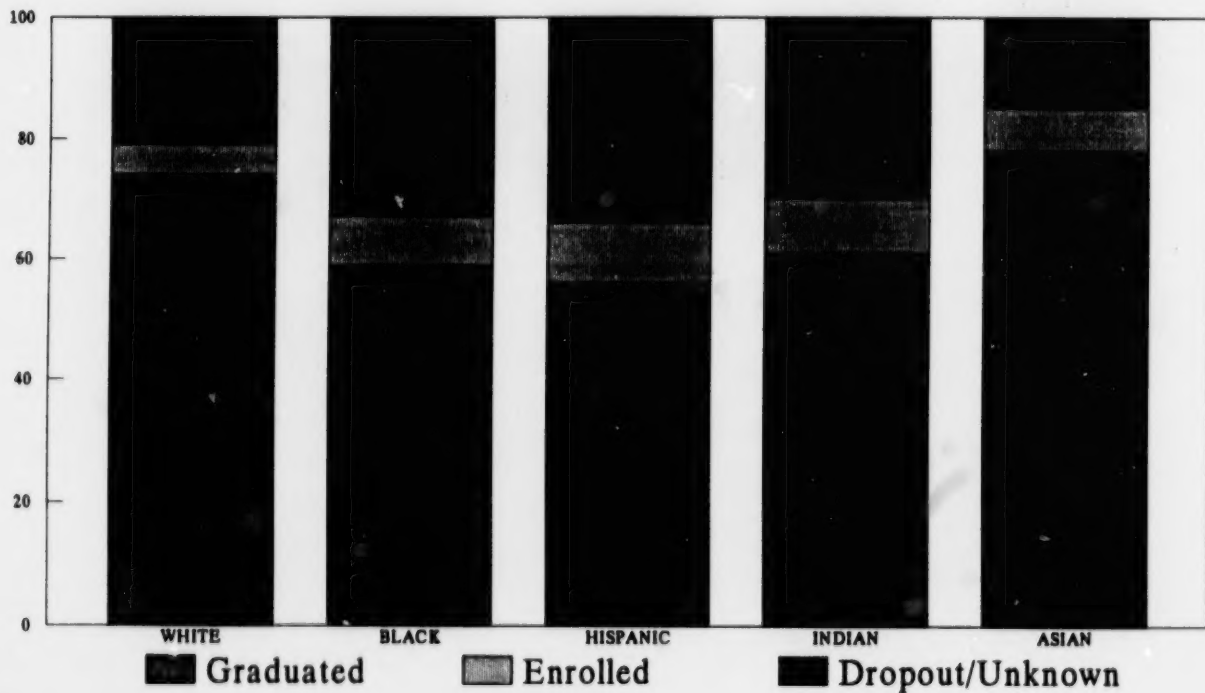

Summary

The participation of all Arizona public high schools and special programs in the Class of 1993 Graduation Rate Study provided valuable insight into the outcome of high school students. Although the nature of a longitudinal study requires considerable diligence and historic data, the vast majority of the schools were able to provide valid reports. Schools have shown a willingness to improve student recordkeeping systems for the purpose of increasing the validity and utility of this and other studies which aid in strategic planning for more effective schools.

The proportions of students who graduated, were still enrolled, and whose status was unknown are shown in the chart below.

99 ** Data are unreliable or methodology was questionable. This report is inconsistent with Year End Enrollment 100 reports filed by the school for 1989-90 through 1992-93. Those data suggest a graduation rate close to 87%.

Colorado River Union High District includes:
Mohave High School
River Valley High School

- * This is a four year cumulative dropout rate including students who are unaccounted for. It should not be confused with an annual dropout rate.
- ** The report for Mohave High School was inconsistent with Year End Enrollment reports filed by the school for 1989-90 through 1992-93. Those data suggest a much lower graduation rate.

File: GRADFORM.WK2

COMPLETING THE GRADUATION RATE STUDY FORM

A. Original Enrollment: Number of students enrolled as first time ninth-graders at the beginning of the 1989-90 school year. Do not include ninth-graders who were retained from the prior school year, 1988-89. (They were members of the Class of 1992.)

B. Transfers In: The total unduplicated count of other students who transferred into the Class of 1993 over the four years of the study (new sophomores in 1990-91, new juniors in 1991-92, new seniors in 1992-93).

C. Transfers Out: The unduplicated count of students on the class list who transferred out of your school to another school or educational program leading to a high school diploma over the four years of the study. Include students who transferred to another public school, a private school, a state juvenile correction facility, or any other school within Arizona or out of state, as evidenced by a request for transcript or other verifiable information.

D. Deceased: Total number of students on the class list who died between the start of the 1989-90 school year and the end of the study, October 1, 1993.

E. Class of 1993 Population: Add Line A and Line B, then subtract Line C and Line D. This will be the base number used to calculate graduation and dropout rates.

F. Graduates: Total number of students in the Class of 1993 who completed graduation requirements or received a Certificate of Completion or Certificate of Attendance at any time before October 1, 1993. Do not include students from a prior class (e.g. Class of 1992) who completed their graduation requirements in 1993.

G. Graduation Rate: Divide the number of Total Graduates (Line F) by the Class of 1993 Population (Line E), and multiply by 100 to express the rate as a percentage.

H. Still Enrolled: Total number of students in the Class of 1993 who have not finished graduation requirements and are still enrolled in the school.

I. Dropout/Status Unknown: Total number of students in the Class of 1993 who have not transferred, died, or graduated, and are not still enrolled in the school.

J. GED Recipients: Total number of students in the Class of 1993 who received a GED certificate after dropping out of your school.

Class of 1992 Fifth-Year Adjustments: Members of the Class of 1992 who were reported last year as still enrolled (Line H) or dropouts/status unknown should be shown on the first line of Fifth Year Adjustments if they graduated from your school since October 1, 1992. Report GED recipients from the Class of 1992 on the second line.
